

Ventura Automation Services In

Electronic Length Measurement Counter That Works For Your Inspection Machine

Since the launch of our first Fabric Length Measurement Counter in 2005, Ventura Automation Services Inc has been dedicated to quality, reliability, and excellence to realize our commitment to "Automation for a Changing Inspection Standards". We focus our expertise on quality, reliability & ease of use. Our products are intuitive, responsive, energy efficient & more productive to our textile clients around the world. PART#: ITM - V 09 Electronic Length Measurement counter is designed to cater all requirements of fabric inspection standards. Rubberized wheels provided on the encoder will not create impression mark avoid slippages. Designed in such a way that look & feel is similar to traditional mechanical counter with LED Display & meter reset button. Calibration option available to adjust measurement for elongation or bad drive synchronization or corduroy fabric.

SALIENT FEATURES

- : 7 Segment RED LED meter Display
- : 16 Volt Power Supply
- : -5° c to 60°c temperature
- : Metal Enclosures
- : Forward & Reverse counting
- : Configurable incremental Order
- : RS-232/USB connectivity to PC
- : Calibration Option through Software
- : Manual Calibration of Length
- : Double shaft rotary encoder
- : 25cms circ. toughened rubber wheel
- : 512k internal memory
- : Meter retaining option during power cut
- : 4 Pin & 3 Pin Metal Connectors
- : Metal Clamp for fixing in machine rod
- : 1 Year Warranty
